JOB SEEKER REQUIREMENTS

1. Job Discovery & Search

Functional Requirements

Job seekers must be able to:

- View a list of all available job postings
- Search jobs using keywords
- Filter job results
- Sort job listings

Search Capabilities

- Search by:
 - Job title
 - Company name
 - Keywords in job description

Filter Options

- Job type: Full-time, Part-time, Contract, Internship
- Location (City / Remote / Hybrid)
- Experience level (Entry, Mid, Senior)
- Salary range (Min – Max)
- Date posted (Last 24h, 7 days, 30 days)

Sorting Options

- Newest first
- Salary: High → Low
- Salary: Low → High

Acceptance Criteria

- Filters can be applied together

2. Job Listing View

Functional Requirements

Job seekers must be able to:

- View job cards in a grid or list layout
- See essential job info:
 - Job title
 - Company name
 - Location
 - Job type
 - Salary range

- Posted date

Acceptance Criteria

- Clicking a job card opens the job detail page
- Job cards are responsive on mobile

3. Job Detail Page

Functional Requirements

Job seekers must be able to:

- View full job description
- View employer/company details
- See application deadline (if any)

Job Detail Content

- Job overview
- Responsibilities
- Required skills
- Salary & benefits
- Job type & location

4. Apply for Job

Functional Requirements

Job seekers must be able to:

- Apply to a job with one click or form

- Upload resume (PDF/DOC)
- Add optional cover letter

Application Rules

- User must be logged in
- Cannot apply twice to the same job
- Application status tracked

Application Status

- Applied
- Under Review
- Shortlisted
- Rejected

Acceptance Criteria

- Successful application shows confirmation
- Duplicate applications blocked
- Resume upload validated

5. Job Seeker Dashboard

Functional Requirements

Job seekers must be able to:

- View all applied jobs
- Track application status
- Withdraw application (optional)

Dashboard Data

- Job title
- Company name
- Application date
- Current status

Acceptance Criteria

- Dashboard accessible only to job seekers
- Data loads based on logged-in user

6. Job Seeker Profile

Functional Requirements

Job seekers must be able to:

- Create & edit profile
- Upload resume
- Update skills & experience

Profile Fields

- Name
- Email
- Skills
- Experience level
- Resume

EMPLOYER REQUIREMENTS

1. Employer Job Posting

Functional Requirements

Employers must be able to:

- Create a new job listing
- Edit existing job listings
- Delete job listings

Job Posting Fields

- Job title
- Company name
- Job description
- Required skills
- Job type
- Location
- Salary range
- Experience level
- Application deadline

Acceptance Criteria

- Only employers can post jobs
- Mandatory fields validated
- Job visible to job seekers after posting

2. Employer Job Management Dashboard

Functional Requirements

Employers must be able to:

- View all jobs they have posted
- See job status:
 - Active
 - Closed
- Edit or close job postings

Acceptance Criteria

- Employers can only see their own jobs
- Closed jobs cannot accept applications

3. View Applicants

Functional Requirements

Employers must be able to:

- View applicants for a specific job
- Access applicant profile & resume

Applicant Information

- Name
- Email
- Resume
- Applied date

- Application status

Acceptance Criteria

- Applicants visible per job
- Resume opens/downloads correctly

4. Application Management

Functional Requirements

Employers must be able to:

- Change application status:
 - Under Review
 - Shortlisted
 - Rejected
- Add internal notes (optional)

Acceptance Criteria

- Status updates reflect in job seeker dashboard
- Only employer who posted the job can update status

5. Employer Profile

Functional Requirements

Employers must be able to:

- Manage company profile
- Update company info

Profile Fields

- Company name

- Company description
- Website
- Location
- Logo (optional)

Common Rules

Authentication & Authorization

- Login required to apply/post jobs
- Role-based route protection
- JWT-based authentication

Non-Functional Requirements

- Pagination for job listings
- Responsive UI (mobile-first)
- API error handling
- Form validation (frontend & backend)
- Secure file uploads
